

EXHIBIT 24
DATE 3/1/11
NO. HR 61

Hello, my name is Betty Doolin. I live in Plains MT, where my family lives and has a ranch/homestead. ~~Over 10 years ago~~ age 35 I am disabled and have been on Medicare since age 25. Over 10 years ago I was injured in a work related accident leaving me severely disabled, having severe bone, nerve, disk issues. In addition, I also suffer from malignant diseases of my pelvis. My health issues cause pain, usually severe. w/ Anxiety/Depression. Because of the use of Comibindes, I've been able to stop the use of morphine daily, in addition to other pharmaceutical medications, that were expensive, terribly bothersome side effects and additional health complications.

- Because of my use of Comibides, I have been able to function somewhat normally, with limited pain and no new health problems caused by pills. I used to take 5 different pharmaceutical medications for pain relief, I no longer have panic attacks, anxiety or stomach problems such as bleeding ulcers, which pill medication caused. I no longer take 5 different pharmaceutical medications because of Comibides.
- If became illegal I would have to return to narcotics and several other medications to help manage my medical conditions. The use of these medications treat my issues but also created more health issues due to the side effects of non modern medication. In addition the risk of accidental overdose with the pharmaceutical medications always needs medical attention and possible risk of death. The risk of an accidental overdose of Comibides are mild compared to chemical medications, almost never needing medical attention and never has cause death and is treated with Vitamin C, orange juice.

If the use of Comibudes are criminalized I would have to return to expensive, damaging medications, because I am financially unable to move to another state, to seek adequate medical care for my survival and existence. I personally feel after years of ~~damage~~ to my body due to the use of Sals for my medical treatment, I will continue use of Comibodes. Which in Montana,

the risk is possible life in prison for having /using an Illegal Drug.. I have never been in trouble with the law. No tickets of any kind. I am not a Criminal and because I want to choose my best treatment for myself for my disability,

Should never make me a criminal!

Thanks for reading
